

Dadi Janki - 3rd February 2019 – Shantivan God's murli is full of magic...

Om Shanti, Om Shanti, Om Shanti... In life I have to use my body, mind and wealth, thoughts, time and breath in a beneficial way both for myself and others. Our breath is running... We have to create elevated thoughts and make our time beneficial. We have received the fortune of sitting here. We are sitting here because Baba has enabled us to recognise who He is and who we are.

Throughout the cycle, this moment in time is of great value. We are here and now. We will see what happens tomorrow... We have had 50 years of the sustenance of Avyakt BapDada. He has taught us so many things. He has made us so light. There are two meanings of light; one is to remain light and the other is physical light. So there is total light in our lives... We also have the light of knowledge. He teaches and tells us to connect our minds to Him. He teaches what effort to make. It is clear what we have to do. My mind should not be going anywhere except to Baba. If my mind goes anywhere, I simply have to tactfully pull it back and connect it to Baba. The Almighty Authority is pulling me towards Himself with the string of love.

Happiness is a nourishment we receive from Baba and it helps us move easily through the day. We don't now have the disease of worry. Our Baba has taught us what we should eat, drink and wear. It isn't that we can eat anything we like. My mind has to imbibe the jewels of knowledge. If I follow the dictates of others then my mind will fluctuate and bring upheaval. We have to pay attention to the self. I shouldn't be thinking much. My intellect should be clean and clear. There is no time now to get caught up in wasteful of negative thoughts. My task is to spread truth and love in the atmosphere. My words should also be filled with truth and love. Speak to others with a lot of love. Wherever we stay we should create an atmosphere of Godly love. For this, maintain quality thoughts. We should now be developing our touching and catching power.

We should now sit together and make plans for effort and for service. We have to remember that it is almost time to go back to our Supreme Abode and then come to play our parts in the land of happiness. So what do we need to do right now? The soul can shed the body at any moment so I have to remain totally ready. My final thoughts will lead me to my destination. I often look at the picture of our ancestor souls; oh souls, where are all of you and what are you doing? They are playing their own parts taking whatever Baba taught along with them.

There are many wonderful attainments through the study. We have cleanliness and simplicity in our intellects. Our hearts are filled with Baba's remembrance. There should be no waste of money, no wasteful thoughts. Peace is our religion. Peace allows us to experience Baba's power. Peace also enables me to experience my own power.

The study, the attainments, the sustenance we have received at the Confluence Age is so great. In fact, we can feel this when we sit in this atmosphere. We attain everything from this atmosphere. There should be accuracy in everything. My life should inspire others to progress and they should also become co-operative. We do service through the body and we have to absorb our minds in service too. Nowadays bodies have become very sensitive but here we receive yoga and medicine. My mind has to become free from attachment; nothing is mine.

There is God's magic in the Murli. Whichever Murli we pick up, it is full of magic. Everything is included in the Murli. We should never miss reading the Murli. It gives us light, might and makes everything right. Whilst living in this world we are doing service in Baba's Yagya. All souls have their own parts to play. No two souls can have the same part. I have to now become detached from this body. Now let your intellect be focused on the One and you will become the embodiment of bliss. Appreciate what you have received and you will remain grateful for all that Baba has given you. This gratitude will increase your love and make you more blissful. Om Shanti
